INDOOR

REST  
CHAIRS

Soave Rocking Chair

*We join thirty spokes  
to the hub of a wheel  
Yet it's the center hole  
that drives the chariot.*

*We shape clay  
to birth a vessel,  
yet it's the hollow within  
that makes it useful.*

*We chisel doors and windows  
to construct a room,  
yet it's the inner space  
that makes it livable.*

*Excerpts from the  
Tao Te King Lao Tzu*

## OUR DESIGNERS

**Alejandro Estrada** *Persistence and observation*

Born in Guatemala, Graduated as an architect from Francisco Marroquin University, studied and worked as an apprentice sculpture in Firenze with the artist Armando Basile and in Carrara at Studio di Nicola in Italy.

Cofounder with Sandra of Piegatto back in 2006, Alejandro works in different fields ranging from architecture where he has designed all sorts of buildings in Guatemala to product design where he creates many of the pieces of the collections presented by Piegatto.

Alejandro believes observation, persistence, simplicity, beauty and good craftsmanship are the most important qualities that an object needs to be created.

His designs explore movement and ergonomics as the central points that when well executed serve to create a unique piece that will add beauty to a space, comfort to their users and a sense of nature, as every piece evokes where we came from and what surrounds us.

Alejandro believes in building a legacy, where his footsteps are just the start to create a world brand that the next generations will follow with their own creativity and knowledge to create joy and happiness to the people that trust in our products.

**Sandra Ovalle** *An interlaced story*

Born in Huehuetenango, Guatemala, Graduated as an architect from Francisco Marroquin University and studied Art Preservation in Florence, Italy.

Cofounder with Alejandro of Piegatto back in 2006, what Sandra enjoys the most is designing, creating rhythms, color palettes, and movements inspired by nature, where she finds the purity of the world. Her inspiration comes from her family.

Taking into account textures, everyday life, and every moment to create new proposals that we will live with. Integrating the arts to discover rhythms and create new concepts.

Her culture and education have been the tools that have helped her design and produce objects and art pieces for Piegatto.

Since 1972, when she entered school, she discovered a passion for the arts, calligraphy, and sewing. They provide her with the mental tranquility that has kept her motivated to do more until this day. The use of color, textures, mathematics, architectural and musical rhythms are the foundation of what she does.

**Pietro Estrada** *Dynamism and new ideas*

Born in Guatemala, Graduated as an Architect and MBA from Francisco Marroquin University, Pietro joined in 2016 and is part of the next generation from Piegatto that adds dynamism and new ideas to the growth of the brand.

He is passionate about reading, studying languages and cultures. His inspiration for designs is based in nature, and the parametric logic behind its patterns. He believes that every good design must understand the functionality of ergonomics and human nature, regardless of scale and use. For him the best designs are the ones that bring tension to space. A hidden force that can be represented by structure, color or materials and that is not easily legible but is tacit to its functionality and doesn't have any meaning without it.

He sees Piegatto beautifying every corner of the design world, entering every market and country in the future. After finishing his Bachelor's degree in architecture he saw the opportunity of expanding this vision by studying a Master in Business Administration and applying it to Piegatto's organization by expanding and standardizing its design processes.

Co-founder of Luz y Piedra, a studio focused on fashion and innovative products.

Born on December 26th, 2000 in Guatemala City. She started her current bachelor's degree in Interior Design in 2019 at the Francisco Marroquin University. She will add her essence with new furniture exploring new materials and forms. With these new and past products, we can create new interiors that beautify the world. She is passionate about photography, design, architecture, music, cinema and sports. She believes that everything in this universe has a correlation, once you understand this it leads to an expansion both within yourself and with your environment.

She has grown up traveling the world and this has allowed her to experience new cultures that have expanded her mind for new ideas. This has helped her to understand concepts of sustainability, wellness, correlation, functionality, story telling...

In addition to launching a line of furniture, she is looking to emerge in the world of cinema to help great directors bring their ideas to life. Merging interior design with production design requires a creative approach that balances both disciplines. By understanding the requirements of each discipline and working collaboratively, you can create a cohesive and immersive visual experience that supports the narrative of the film while also creating a functional and aesthetically pleasing space. She will achieve this by staying at the forefront of design and technology trends, and by constantly pushing herself to innovate and learn.

**Analuz Arévalo** *Intuition and sharpness*

Born in Guatemala, Graduated as an Industrial Designer from Rafael Landívar University and MBA from Francisco Marroquin University, she has been professor of Industrial Design at Del Istmo University. Analuz joined Piegatto back in 2018 where she has been a cornerstone to our growth.

She has always been curious about new materials, experiences, and the relationship of people with the process of creation. For her, design is about connecting people. It creates a bond between the craftsman, artist, producer, and user, as they all have something to contribute into the process. That's what she enjoys about creating objects and art, how everything starts with a dream, an insight and evolves into becoming an extension of ourselves. Be it objects we use or art we contemplate.

Skilled in collaborative projects working with artisans, other designers and developing new techniques and materials. My journey in design began by working with fine woods, natural fibers, textiles and ceramics. "When we design an object or a space we are remodeling our behavior. That's what an artist is, to create and innovate yourself everyday without fear to change."
